

Data Classification and Handling Policy

Document ID: SEC-003 | Owner: Nadia Boonyasak | Department: Security
Classification: Internal | Status: Active | Last reviewed: September 12, 2025

Every piece of Halcyon data falls into exactly one of four tiers.

Public

Marketing material, published documentation, press releases. No restrictions.

Internal

Default for anything not otherwise classified. Org charts, most policies, internal roadmaps, meeting notes. Shareable within Halcyon. Not to be posted externally or shared with vendors without an NDA.

Confidential

Customer contracts, financials before public release, security runbooks, employee compensation, unreleased product plans. Access on a need-to-know basis. Must not be copied to personal devices or personal cloud storage. Sharing externally requires the document owner's approval.

Restricted

Customer production data, credentials and secrets, personal data subject to GDPR or CCPA, security incident evidence, anything under legal hold.

Restricted data must never be pasted into external tools including AI assistants, must never be emailed, must never leave approved systems, and must be accessed only from a managed device on the corporate tailnet. Access is logged and reviewed quarterly.

Labeling

Documents in Beacon carry a classification field. If a document is unlabeled, treat it as Internal. If you are unsure whether something is Confidential or Restricted, treat it as Restricted and ask in #ask-security.
